

These all are the various websites whose photos i have inserted here

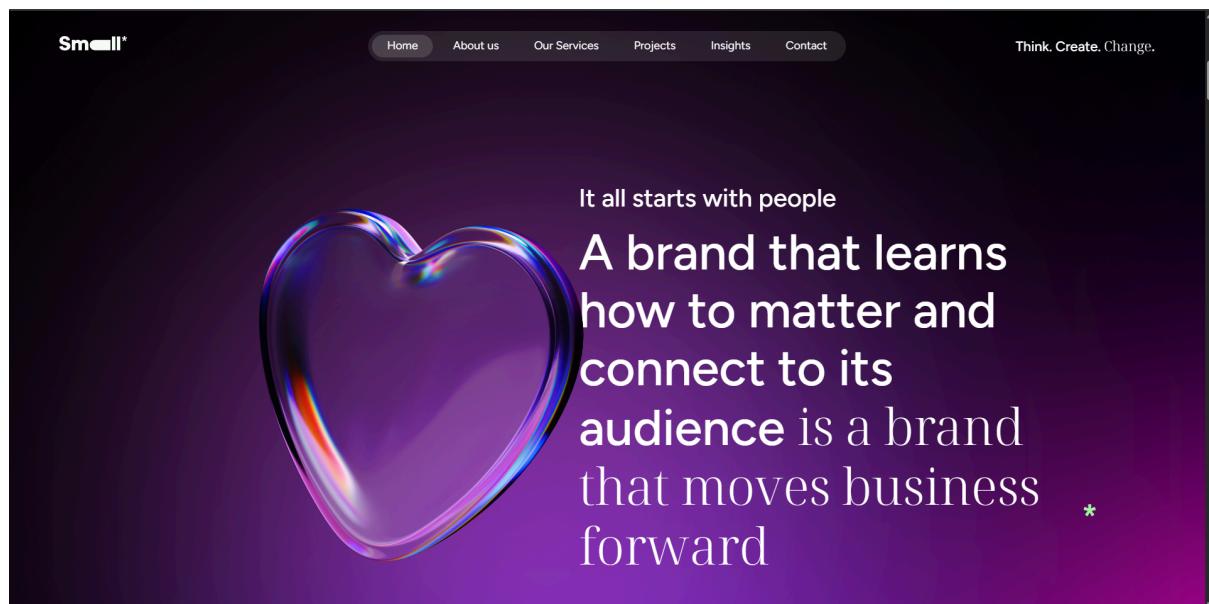

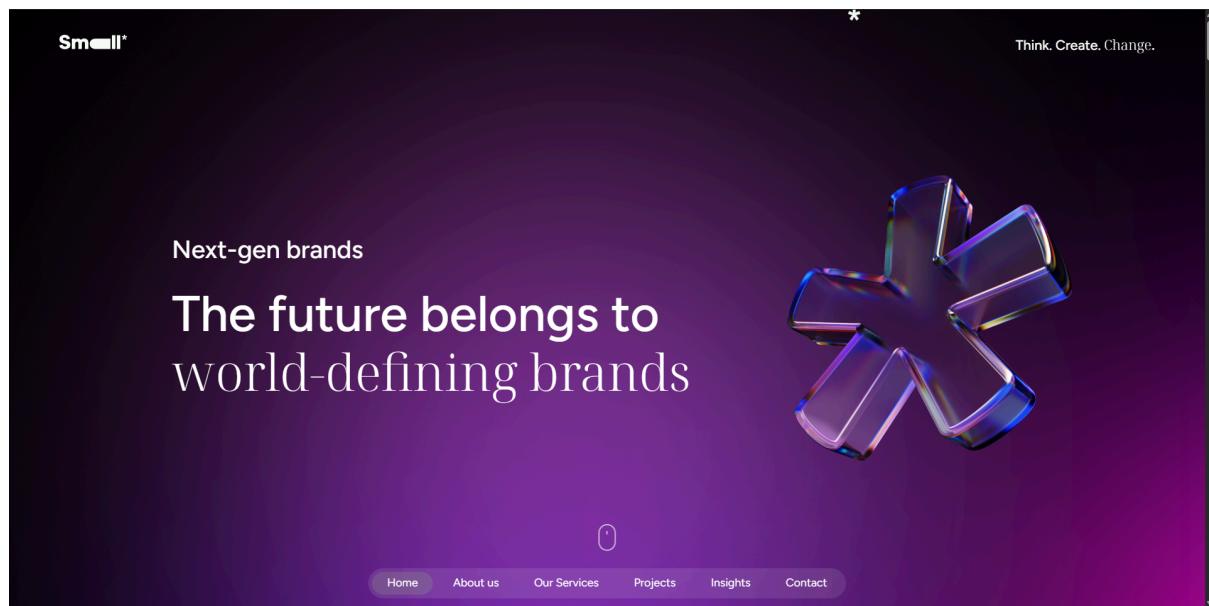

These photos are for reference. Do not copy them.

Use them only as reference.

All these websites are scrollable and dynamic.

They are extremely attractive

Any animations you would make, try to make it similar to our project that u already know.

WEB DESIGN BY FHOKE

This page section highlights expertise in Data Science and Artificial Intelligence. It contains four service cards, each with a 'Data Science Expertise' badge:

- Consulting**: Described as identifying high-potential AI use cases. It includes a screenshot of a financial scorecard with columns like Objective, Measure, Owner, Target (M), and Actuals. A 'Discover >' button is present.
- Data collection and integration**: Described as the heart of any AI project. It includes a screenshot of a Jupyter Notebook with Python code for data analysis, showing calculations like Q3 = df['col_name'].quantile(0.75) and TQ = df['col_name'].quantile(0.25). A 'Discover >' button is present.
- Data model creation**: Described as creating AI models. It includes a screenshot of a machine learning pipeline interface with various steps and parameters.
- Large-scale deployment of your AI**: Described as making AI actionable. It includes a screenshot of a cloud-based deployment interface showing multiple AI instances with details like Name, Image, Status, CPU (%), Port(s), Last started, and Actions.

The footer of this section includes links for AI Coaching, Development, Our Work, Team, and Contact Us, along with social media icons for Facebook, Twitter, LinkedIn, and YouTube.
